

ADEOLA DOKUN, GISP

CELL: (919)-255-2671 | EMAIL: adokun17@gmail.com | www.linkedin.com/in/aodokun-gisp

PROFESSIONAL SUMMARY:

Results-oriented GIS professional with over 10 years of experience in geospatial data management, documentation, and data analysis. Proven track record in implementing QA/QC protocols and integrating datasets using platforms like ArcGIS, while ensuring compliance with federal standards. Skilled in agile project leadership and cross-functional collaboration to deliver reliable geospatial solutions.

CORE STRENGTHS:

- Project Management & Agile Methodologies
- Geospatial Analysis & GIS Expertise
- Business Analysis & Requirements Gathering
- Cross-functional Team Collaboration
- Testing, QA & End-to-End Validation
- Training, Mentorship & Knowledge Transfer
- Technical Proficiency Across Platforms & Tools
- Work Optimization & Process Improvement

PROFESSIONAL EXPERIENCE:

Project Lead – ECS Federal, Remote

9/2024 – 6/2025

- Collaborated with the United States Postal Service (USPS) GIS team and led a project team in developing an automated process involving geospatial big data and metadata governance for generating and validating new road data. Incorporated established QA/QC protocols to ensure data quality and integration.
- Performed large-scale data analysis using Databricks to support strategic decision-making, improved operational efficiency and Improved data processing from 4 to 2 days.
- Provided weekly status updates to stakeholders and milestones. Managed project timelines and deliverables while maintaining adherence to government schedules and specifications, ensuring data consistency and compliance.
- Utilized ESRI product suite, ArcGIS Server web services, geospatial databases (e.g. Oracle spatial, SQL Server) to optimize data workflows and uncover and tune key trends to determine new roads.

Senior GIS Analyst/Scrum Master – NV5, Remote

9/2023 – 9/2024

- Supported mobile GIS application development for the Bureau of Land Management, Department of the Interior (DOI), leveraging expertise in geospatial data management and spatial visualization.
- Facilitated scrum and planning meetings; maintained user stories, bugs, and tasks in MS Azure DevOps to ensure streamlined project coordination.
- Managed software deployments, testing, and documentation reviews; contributed to accurate data cataloging and metadata development to enhance geospatial system integrity for field technicians capturing data features.

GIS Consultant – Waypoint GIS Consulting, LLC, Remote

5/2021 – 10/2023

Business Analyst - Northwest Natural (4/2023 – 10/2023)

- Led business analysis efforts for several projects: ESRI Utility Network migration, Cyber Security migration, and Physical Security Enhancement project.
- Interviewed stakeholders to gather process workflows. Identified and documented project requirements; managed, validated, and prioritized business requirements.
- Identified and documented existing processes and use cases, designed future-state processes, and prepared requirements traceability matrices.
- Documented business requirements in Azure DevOps. Utilized screen mock-up tools such as Visio and SnagIt.

Project Manager – New Mexico DoIT (12/2022 – 4/2023)

- Managed the GIS broadband team and performance metrics, and performed tracking analysis for the New Mexico FCC Broadband project; created ESRI dashboards that displayed broadband status statewide and regionally and by technology.
- Presented status updates to stakeholders and participated in project planning meetings. Served as Scrum Master and managed GIS team bi-weekly scrum; maintained JIRA dashboard, added tasks, and kept team on track with stakeholder priorities.

- Prepared ArcGIS Online maps for display. Reviewed and updated FCC broadband data collection points and attribute information using ArcGIS Pro.

GIS Consultant – PG&E – (5/2021 - 12/2022)

- Collaborated with the Power Shutoff Safety (PSPS) team to enable access to upcoming shutdown events, developing and executing test scenarios using ArcGIS Online (HUB, Experience Builder, Survey123), Jupyter Notebooks, and SQL. Participated in disaster recovery exercises and full-cycle testing.
- Supported the development and maintenance of mobile GIS applications for the Enhanced Vegetation Management Program, enabling field teams to collect and update data to mitigate vegetation risks near power lines.
- Performed spatial proximity analyses, validated field surveys, ensured database synchronization, and produced high-level documentation for business stakeholders..
- Contributed to the Microgrid Project, designing portal access for internal and external users to securely view restricted PGE grid data across desktop and mobile platforms.
- Verified data consistency across AGOL, Hub Portal, web maps, and external databases such as Foundry.
- Led requirements gathering and data validation to support product development and QA initiatives.
- Facilitated agile, sprint planning and backlog grooming meetings. Identified and escalated defects, recommended product enhancements, and participated in end-to-end testing.
- Authored and maintained a comprehensive Wiki page to support knowledge transfer and onboarding for the Microgrid support team; utilized MS Office suite and screen mock-up tools such as Visio and SnagIt.

Senior Systems Analyst/Project Lead – ECS Federal, Memphis, TN

12/2016 – 5/2021

- Led USPS GIS staff and enterprise-scale projects that enhanced operational efficiency and customer service across the U.S.; initiatives included maintaining national delivery route lines, facility data, and supporting tools like Every Door Direct Mail (EDDM), Retail Analytics, and ESRI Business Analyst for data-driven decision-making and automation.
- Spearheaded automation initiatives that replaced manual ETL workflows with standardized pipelines, accelerating data updates and improving delivery timelines.
- Delivered strategic insights and regular progress updates to stakeholders and senior leadership. Collaborated with clients to define requirements and translate needs into actionable plans, using agile and tracking tools to ensure transparency and timely delivery.
- Managed customer support staff and implemented an incident tracking system in ServiceNow. Initiated and coordinated departmental training on industry-standard applications and tools.

Senior GIS Analyst – Genesis10, Raleigh, NC

4/2015 – 5/2016

- Contributed to the North Carolina Dept of Transportation (NCDOT) Strategic Prioritization initiative, applying GIS methodologies to evaluate, implement, and analyze geospatial applications and data products.
- Managed and maintained the state road line network using Linear Referencing System (LRS); validated third-party network models for compatibility and accuracy.
- Updated hurricane evacuation routes and NCDOT fuel depot locations; performed data analysis and constructed GIS databases aligned with organizational standards and best practices.
- Conducted QA/QC reviews, identifying and reporting data issues or defects that could impact product release timelines and performance.

Community Dev. Temp - Albemarle County Community Development Dept., Charlottesville, VA

10/2014 – 4/2015

- Maintained and updated county datasets using GIS mapping software, including zoning, land use, historic preservation, environmental resource protection, school district boundaries, water infrastructure, and park facilities/trail networks.
- Conducted demographic analyses to support equitable outreach strategies for underrepresented communities.
- Reviewed and corrected outdated parcel boundaries, managed county address data within the geodatabase, and produced thematic maps tailored to internal departments and external stakeholders.

Senior Systems Analyst/Project Lead - S&P Global, Charlottesville, VA

3/2011 – 6/2014

- Served as Content Lead and Subject Matter Expert for the global Demographic Data Department, overseeing business analysis, KPI monitoring, workflow optimization, and the development of standard operating procedures.
- Provided technical support to cross-functional teams and training to direct reports, focusing on geographic and demographic data applications.

- Led content strategy in project planning and product design, authoring business requirements and use cases to guide development.
- Contributed to ETL processes for weekly and monthly demographic data updates, and participated in Agile sprint planning, grooming meetings and user story creation.
- Assessed new vendor datasets to inform product and service enhancements, and provided executive-level summaries to stakeholders and senior leadership.
- Proposed and scoped a custom data access tool enabling clients to tailor business analysis outputs to their needs.
- Designed and executed test plans and test cases, participated in product walk-throughs, validated data loaders, and recommended workflow and functionality improvements.

GIS Analyst - CSZNet, Washington, DC

4/2010 – 3/2011

- Analyzed and updated Broadband datasets for the DC Office of the Chief Technology Officer (OCTO); worked with provider agencies to gather data; provided technical support and expertise to District agencies and users; designed QA/QC processes, and prepared metadata.
- Created database and maps of broadband service territory areas to show availability and adoption areas and prepared maps of middle-mile broadband facilities. Prepared a White Paper on the DC Broadband process.

GIS Coordinator – North Carolina State University, Raleigh, NC

7/2003 – 7/2009

- Maintained NC State DOT GIS database; created a campus spatial inventory of parking spaces and zones, bike racks, bus routes, blue lights, and other assets; prepared spatial analysis on layers for campus maintenance and potential project enhancements. Served as GIS SME to management and staff; collaborated with other NC State departments, providing data and maps.
- Prepared transit brochures; updated the department website; maintained RFP to solicit printers; maintained software and hardware devices.

COMPUTER SKILLS:

GIS & Spatial Platforms: ArcGIS (ArcMap, ArcGIS Pro, Business Analyst, ArcGIS Online, ArcGIS Server), Model Builder, Survey123, Experience Builder, Field Maps, Hub, ESRI Dashboard, Jupyter Notebooks

Agile Project Tools: Azure DevOps, Jira, Microsoft Team Foundation Server (TFS), VersionOne

Cloud Platforms: AWS (working knowledge)

Programming & Databases: Python, SQL, PostgreSQL, HTML, XML, JavaScript, CSS, Databricks

Data Visualization & Graphics: Tableau, Adobe Suite (Acrobat, Photoshop, InDesign, Illustrator), SnagIt, Visio, draw.io

Additional Tools: Microsoft Office Suite, ServiceNow, Citrix

Operating Systems: Windows

EDUCATION:

Master's of Science in GeoInformatics, University of Iowa, Iowa City, Iowa (Expected Completion Fall 2025)

Arthur A. Collins Scholarship Recipient, 2024-2025

Bachelor of Arts in Political Science, CUNY Queens College, Flushing, New York

PROFESSIONAL CERTIFICATIONS:

GISP Certificate, GIS Certification Institute, Des Plaines, IL, License 16301 *February 2009 – February 2028*

Pathways Leadership Development Program Certificate, NCSU, Raleigh, New York, *May 2009*

Project Management Fundamentals, Lynda.com, License 177991, January 2016

Project Management Simplified, Lynda.com, License 27CE04, January 2016

VOLUNTEER WORK:

Member, Coralville Planning and Zoning Commission, Coralville, IA - January 2023 – Present

Member, Board of Directors, One University Place North Condominium Association, Iowa City, IA – April 2024 – Present

Mentor, The University of Iowa Gradlife Peer-to-peer, Iowa City, IA – June 2024 – May 2025
